

great interest. The exact positions of the atoms in larger numbers of molecules are now being obtained by X-ray measurements, and light is also being thrown on the exact nature of the bonding by the examination of the Raman Spectra and other methods.

One feels that in a few years we shall understand the meaning of valency in fuller measure.

SUBSCRIPTIONS

Will recipients of this journal who have not yet forwarded their subscriptions to the Australasian Medical Publishing Company, Limited, Seamer Street, Glebe, New South Wales, please do so immediately?

The sum is small, and consequently easily overlooked; but we are not able to distribute it to non-subscribers.
