## ABSTRACT

The tertiary sector has been rocked to its core by the COVID-19 pandemic and the subsequent shift to online teaching. One of the areas most impacted has been how we assess our students and the associated challenges relating to academic integrity, quality, and logistics. The 2021 ACSME Chemistry Discipline Day workshop will focus on these challenges and aims to crowdsource ideas for solutions at both an individual and institutional level. This conversation is an extension of a recent workshop at the RACI Chemistry Education Division Symposium and outcomes from this workshop will inform discussions held by our representatives with the Australian Council of Deans of Science (ACDS).

Proceedings of the Australian Conference on Science and Mathematics Education, 29 September - 1 October 2021, page 85, ISSN 2653-0481
