^bSchool of Science and Technology, University of New England, Armidale NSW 2350, Australia

Please join the RACI Chemistry Education Division (CED) for the 2022 ACSME Chemistry Discipline Day. The event will start with an introduction and outline of the CED and how this division currently serves the chemistry community in Australia. We will then facilitate round table discussions to develop ideas for the Chemistry Education Research (CER) community in Australia to ensure an updated and relevant framework for the CED is in place to support the teaching and learning of chemistry in Australia. This will include breaking out into groups to discuss audience derived topics with the intention of building collaboration opportunities and networking. This event will be of interest to secondary and tertiary chemistry educators, education focused and non-education focused chemistry academics, and undergraduate or postgraduate students with an interest in chemistry education.

Proceedings of the Australian Conference on Science and Mathematics Education, The University of Western Australia, 28-30 September 2022, page 86, ISSN 2653-0481
