**KEYWORDS:** fostering teaching innovation

## ABSTRACT

VicTeach was established in 2013 as a part of a Learning and Teaching Development initiative. It promotes cross-disciplinary dialogue between Victoria staff interested in pedagogy, sharing best practice, implementing new teaching approaches, and participating in and disseminating research on teaching and learning. It has become a particularly helpful network for academics interested in developing and informing their own teaching practice, but for whom education is not their main disciplinary focus; and for general staff supporting academics in their teaching and student support.

Regular bi-monthly meetings have addressed issues such as:

- new technologies and pedagogies,
- supporting Maori and Pasifika students,
- large classes,
- internships and placements,
- social media,
- flipped teaching,
- active learning and
- transition from high school.

Meetings are held around the distributed VUW campus, streamed live, and archived for future-viewing. The community itself also continually tests, promotes, and profiles new technologies that all Victoria staff can use in teaching.

Every seminar in the VicTeach programme attempts to include:

- Best practice examples from a real teaching scenario
- Pedagogical grounding / research related to the topic, technology, or teaching concept
- Academic staff championing the topic/ technology / teaching concept
- Support staff with expertise in the area, or able to support development of this technology/ concept
- Time for discussion

Over 200 academic and general staff members from across the university voluntarily subscribe to the VicTeach listserv and approximately 20-45 attend each event. The group is led by a volunteer steering committee consisting of academics from all Faculties, teaching award winners, and representatives from the Centre for Academic Development, Student Learning, the Library, and IT Support. This structure has been designed to ensure the organisation is sustainable and can continually respond to staff needs in learning and teaching. Future plans include the development and support of research hubs which will foster cross-disciplinary initiatives into particular aspects of teaching and learning.

VicTeach appears to address an unfilled professional development need for Victoria University staff. In a survey conducted at the end of the first year the community reported that they had gained value from VicTeach, and most appreciated that it is pan-University, pan-staff, self-selecting, occurring at a regular time, grass-roots, and participant-led. As such it appears to be distinctive and unique in the tertiary sector.
