## ABSTRACT

The introduction of quality standards can place delegates to the ACSME conference in the forefront of reflection on, and changes to, teaching in their school, faculty, and university. How do you make the transition from being someone who experiments and implements strategies to teach more effectively into someone who leads colleagues in doing so? Furthermore, what support can you gain in that process, both support from within your institution, as you work to help others to satisfy externally imposed standards, as well as support from outside your university?

Proceedings of the Australian Conference on Science and Mathematics Education, University of Sydney, Sept 26<sup>th</sup> to Sept 28<sup>th</sup>, 2012, page 75, ISBN Number 978-0-9871834-1-5.
