

THEORIA to theory

An International Journal
of Science, Philosophy
and Contemplative Religion

EDITOR Dorothy Emmet

Explorations in the sciences and technology that affect our understanding of religious and philosophical questions — these are the basis of this quarterly journal. **Theoria to Theory** holds that traditional religion has been primarily, and at best, concerned with mystical or contemplative experience; therefore it is important to a widened science in providing one source of insight. **Theoria** was the old Greek name for this insight; **Theory** here stands for an enlarged and revised scientific understanding. The journal title represents an effort to keep the two on terms with each other.
