Western System — Junction of main branch sewers

Diagram showing uniform flow line of main sewer and maximum ordinary condition and variation of flow line of main sewer, ordinary condition, 20 years hence.

Western Sewer
Northern Sewer
Eastern Sewer

Main Outfall, 28 in. each
6 in. grade, 6 in. grade, 6 in. grade

Flow line of combined maximum sewer and maximum 20 years hence.

Flow line max. daily sewage from preservation population 15 years hence, water supply 75,000.

Flow line max. daily sewage from population 3 to 5 years less water supply 75,000.

Flow line max. daily sewage from population 3 to 5 years less water supply 75,000.
