Diagram 1.
Showing the Tonnage of Shipping Arrivals at Port Jackson.

In each year from the Foundation of New South Wales until the End of 1907.

Also the probable (pro-rata) increase by the years 1910, 1915, and 1920.

Up to 9 millions, 12 millions, and 15 millions of tons per annum.

The Nineteenth Century.

Note: The vertical lines represent intervals of Ten Years.
The horizontal do. one Million Tons.

Thus in less than 15 years the present Wharfage should be doubled.

Compiled May 1908 by Norman Selle.

Note: The figures are official, see reports of Harbour Trust.
